

TAHTA FAILAH MUBARAK

FULLSTACK DEVELOPER / SOFTWARE ENGINEER

Lumajang, East Java, Indonesia • tahtafailah@gmail.com • +62 857-0768-1288

PROFILE

Full-Stack Developer with 6+ years of experience building practical, user-centered web applications. I enjoy solving problems through thoughtful design and clean implementation. Whether working independently or as part of a team, I'm committed to writing maintainable code and contributing to products that are genuinely helpful to users.

EMPLOYMENT HISTORY

NUROSOFT IT CONSULTING | JAN 2022–PRESENT

FullStack Developer / Odoo Developer

- **Web Automation App Development for Japanese Company:** Contributed to the development of a web-based automation platform using FastAPI, GraphQL, and React. Involved in building scalable backend services, designing GraphQL APIs, and developing responsive user interfaces to streamline and automate business workflows.
- **Odoo 17.0 Technical Trainer for Manufacturing Company IT Team:** Provided technical training focused on ERP development using Odoo 17, core modules, and basic customization relevant to manufacturing processes.
- **Educational Web Application Development:** Developed backend of a subscription-based educational platform using Express.js and supported front-end development with Vue.js, focusing on RESTful APIs and user experience.
- **Odoo 14.0 Revamp Portal Development for Digital Infrastructure Company:** Led customer portal redevelopment by decoupling it from monolithic Odoo and rebuilding with React and REST APIs, significantly improving scalability and UX.
- **Odoo 14.0 Enterprise Development for Digital Infrastructure Company:** Customized Odoo 14.0 Enterprise to automate business processes such as project management, CRM, accounting, and inventory for a digital infrastructure company, enhancing scalability and operational efficiency.

KREATINDO | SEPT 2023 – FEB 2024

FullStack Developer (Freelance)

- **Whistleblowing System Development:** Built a confidential reporting platform using Next.js, Tailwind CSS, Express.js, and MySQL. Handled both frontend and backend, system integration, bug fixing, and maintenance throughout the project cycle.

UMY (PT. UMAT MANDIRI BERKEMAJUAN – TECHNO CREATIVE) | MAY 2018 – DES 2021

FullStack Developer

- **Academic Web Application Development:** Developed full-stack academic portals using Laravel for lecturer and student admissions. Customized modules and user interfaces to meet diverse university client requirements.
